Reply to Attn of:

EA-06-007

To: Team Members

From: EA2/AMS Project Manager

Subject: Contact with Peoples Republic of China Agencies and Firms

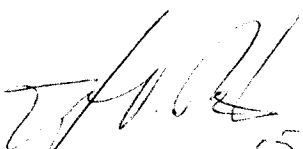

Let me take this opportunity to reiterate our existing policy concerning contact and communications with the AMS Collaboration members from the People's Republic of China (PRC). The AMS Project Office at JSC may have contact with all known AMS Collaboration members from the PRC. These known members have been reviewed by NASA Headquarters and approved for communication that is in the public domain. Do not send or discuss data with anyone from these Collaboration Member organizations that is not in the public domain.

Again, this is not a policy change. This means that we should continue to function in the same manner that we have since the inception of AMS. I remind you to error on the side of caution. If you have any concerns at all, please bring it to my attention.

Please forward to anyone on the team that has any contact with AMS Collaboration members.

Please ensure that you comply with all Export Control Regulations in dealing with all Collaboration Personnel.
